

Market Annual Report

- 2017

In this report

- 5 Message from the President
- 7 Board of Directors
- 8 Member Companies
- Technical Committees
- 13 ACAL Activities in 2017 and into 2018
- 19 Analysis
- 25 Financial Tables

From the President

s President of the insurance association, my first aim has always been to enhance the communication with our members. At the time of writing this report, 49 interactions with ACAL members took place through e-mail.

Insurance companies worldwide carry unfortunately still a bad image among the community, although this is changing slowly. It is no different in Lebanon and I dedicate most of my time to hold high the image of our profession, participating in all the economic events from the different associations of the productive sectors. These productive sectors are providing the government with recommendations from time to time.

With interviews on all media, I have explained that insurance conditions must be read and understood before signing a contract. And that anyway all registered insurance brokers can advise on the best insurance terms and conditions that the client should buy for the best interests of their needs. I also refer all complaints to the hotline, ICC Care, of the Insurance Control Commission (ICC).

In this respect, we can only thank the ICC for helping insurance companies sort out litigious cases with their very professional staff. But we also rely on the ICC to bring reforms in our market: namely corporate governance and risks based capital, which should enable us to obtain soft loans from the Central Bank for mergers & acquisitions.

\$1,635,658,826 WRITTEN PREMIUMS

We have maintained close contact with the ICC, Ministry of Interior, Ministry of Environment, Ministry of Energy and Water, Ministry of Finance, and Money Laundering Department for insurance

matters. The Lebanese Petroleum Administration is keeping us informed on the development of oil & gas research, which eventually will be insured by registered companies locally.

On the international side, we have exchanged a lot of information with the Fédération Française des Sociétés d'Assurances (FFSA), AM Best, and the Federation of Afro-Asian Insurers & Reinsurers (FAIR).

All throughout the year, we have been organizing conferences for our members on subjects like oil & gas, digitalization, and corporate governance, as well as training sessions. We nevertheless remain in close contact with the Institut Supérieur des Sciences de l'Assurance (ISSA) at Université Saint-Joseph, which is delivering insurance courses up to the master's degree, and with the Lebanese German University (LGU) which is delivering CII courses.

As president of the General Arab Insurance Federation (GAIF), which is the largest federation worldwide with more than 300 companies from 20 Arab countries, I have with my colleagues of the Executive Committee and Board implemented corporate governance principles that will improve the image of the federation with its members.

I would not like to end this report without thanking the dedicated and professional staff of ACAL for their great contribution and also our auditors, Messrs. Semaan Gholam & Company, as well as our legal advisors, Messrs. Haddad, Baroud, Daher and Tohme.

Finally, a warm thanks to ACAL members, who have always expressed their support.

> Max Zaccar **ACAL President**

IO

ACAL activities in 2017 and into 2018

firmly on developments for the future. Activities of the association included both digital and event highlights.

The first digital activity by ACAL in 2017 was the launch of a redesigned website in the first half of the year. As concerning events and conferences of importance for all insurance stakeholders in Lebanon, ACAL engaged its member companies, public experts, and wider audiences by focusing on two crucial development areas: the digitization of insurance

and insurance of the nascent Lebanese oil and gas industry.

The association tackled the digitization issue in a two-day conference in early May 2017. Under the title "Digitalization in Insurance: A Threat or an Opportunity?" experts from countries in the Middle East and North Africa as well as Europe convened in Beirut on May 3 and 4, 2017. On a wide range of issues in the digital future of the insurance industry, speakers represented insights from knowledge-leading corporations such as Microsoft, La Famille, Global Sign, AIG, Allianz, Munich Re, and Swiss Re. The event was organized by ACAL in collaboration with the General Arab Insurance

\$1,171,235,404 SHAREHOLDERS' EQUITY

Federation (GAIF) and held under the auspices of the Ministry of Economy and Trade in Lebanon.

This conference on digital opportunities for Lebanese insurers was followed

in the summer of 2017 by a one-day conference on the insurance for the nation's energy assets and the emerging oil and gas sector. Organized by ACAL, it was held two years after the association held a first such conference. Like in the first oil and gas conference back in 2015, the central issue in the 2017 event was the development of an ACAL-managed pool that will facilitate adequate insurance for the country's emerging oil and gas industries.

Speakers addressing the conference included ACAL President Max Zaccar; Wissam Zahabi, the head of the Economic and Finance Department at the Lebanese Petroleum Admin-

istration (LPA); visiting oil and gas insurance expert Chris Dear, the managing director of Willis Energy; the acting head of the Insurance Control Commission at the Lebanese Ministry of Economy and Trade, Nadine Habbal; and the ACAL legal counsel, Maitre Ziad Baroud, former minister of interior. Presentations were interspersed with questions and with a lunch hosted by ACAL for Lebanese insurance companies in attendance at the event.

Throughout 2017 and into the following year of 2018, the association, led by its highly qualified and committed Board of Directors, chaired by ACAL President Max Zaccar, continued to have many points on its agenda. Topics relentlessly pursued by ACAL's board throughout the 2017-2018 period included:

Medical insurance and the Guaranteed Renewability Option

2018 saw the implementation of a important decision by the Insurance Control Commission at the Ministry of Economy and Trade to provide privately insured citizens with medical safety through the guaranteed renewability of medical and hospitalization insurance contracts.

The board of ACAL dedicated itself to the compliance with the MoET decree on the "Guaranteed Renewability Option" and pursued this matter with great interest, sitting for several meetings with the minister of economy and trade and ICC officials, in order to achieve an optimal path for the implementation of this socially and economically important decision. These meetings contributed to the course of action as decreed through the issuance of minis-

terial decision No. 186 as of 17 April 2018.

Corporate governance integration

After launching an initiative for improvement of corporate governance in

the insurance sector and greater understanding of the relevant issues by insurance companies in 2017, the ACAL board pursued the governance theme further in 2018, doing so in cooperation with Lebanese consultancy Tamayyaz and the World Bank. The aim of this focus on governance is improved understanding by sector leaders of governance principles and development of ways for their effective implementation. Besides this focus on governance, ACAL's Board of Directors also prioritized issues of tolerance and integration in its agenda for 2018 and beyond.

Oil and gas insurance

After the association collaborated with international oil and gas insurance experts in 2017, namely the international firm

The aim is improved understanding by sector leaders of governance principles

\$427,398,852 PAID-UP CAPITAL

ACAL's committee on automotive insurance has developed several

proposals

Willis Tower Watson, ACAL developed this collaboration further in course of 2018 with international brokerage March. At the beginning of the year, the association also convened a seminar with multinational energy firm Total that once again highlighted the importance of the Lebanese insurance sector in insuring the risks of oil and gas.

Compulsory third-party liability insurance for motor vehicles and the coverage of material damages

The association continues to follow with great interest the issue of additional coverage, i.e., covering the material damages from vehicular incidents under compulsory insurance contracts. In coordination with the National Bureau for Compulsory Insurance, ACAL's committee on automotive insurance has developed several proposals on this file. An important cooperation in this regard relates to compensation schedules (Barémisation). ACAL engaged in meetings with representatives of the World Bank, which is providing assistance to the Ministry of Economy and Trade in the perfection of TPL compulsory motor insurance in Lebanon. Seven years after the launch of the Motor Risk Center (MRC) initiative, the MRC and its 30 affiliated companies in 2018 continued to exchange information related to accidents recorded by these companies. The association continues to pursue the issue of the accession of all companies to the center.

Other activities by the President and Board of ACAL

Through its president, the association participated throughout the year in all the meetings of the Arab General Union. In addition, ACAL was represented in the meetings of the organization of Economic Bodies and in the meetings of the Chamber of Commerce, Industry and Agriculture. Furthermore, ACAL President Max Zaccar in 2018 took part in conversations with the team of international consulting company McKinsey that has been tasked by the Lebanese state to design a Lebanon Economic Vision, which was completed in the fourth quarter of 2018. The Association also decided, in the framework of its participation in the international bodies concerned with insurance, to join the Federation of Afro-Asian Insurers and Reinsurers (FAIR). The organization held one of its Reinsurance Forum meetings in 2018 in Beirut, in cooperation with ACAL. The association also decided to join the Global Federation of Insurance Associations (GFIA).

In studies, seminars and training courses

Pursuing its strategy for providing education and professional training for insurance sector members and company representatives, ACAL held two meetings in January of 2018. These meetings were organized in context of the association's governance

improvement agenda and were titled "Presentation on Corporate Governance to ACAL Members". ACAL further continued the program of offering training seminars for member companies. The seminars were prepared by Ms. Lilian Baaklini and covered the following topics:

- Insurance Fundamentals, Introduction to Insurance)
- Basic Principles of Insurance
- Characteristics, Structure and Analysis of an Insurance Contract (with special reference to the COC)
- Property All Risks
- LM7 Wording
- Property Insurance Part II: Common Market Clauses
 & Extensions

ACAL also undertook and published several studies in the course of 2017 and 2018, including:

- Quarterly Market Report of Lebanese Insurance Market Statistics
- Annual Market Report (2017)

1/

A C A L

Analysis

ased on received data forms for 45 Lebanese insurance companies and diligent computation of numbers for all 50 member companies of the Association des Companies d'Assurances au Liban (ACAL) the insurance sector achieved written premiums of \$1.636 billion in 2017, reflecting an increase by 3.45 percent from the previous year. The rate of increase slowed in 2017 in context of a challenging political and economic climate in the country and was 66 basis points (bps) below the rate of increase in 2016.

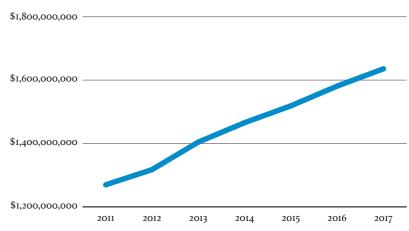

Assets held by ACAL members at 31 December 2017 reached \$4.828 billion in year-on-year growth of 5.01 percent, the highest y-o-y growth in the past three years. When comparing the

year-on-year percentage change rates for 2017 with those achieved in the previous year, it becomes evident that written premium gains were stronger by 48 basis points in percentage terms while the development of assets showed slower growth rates (2.59 percent in 2016 versus 4.4 percent in 2015). However, sector profits improved by 8.32 percent in 2017 as member companies reached a net income of \$153.17 million.

The distribution of written premiums in 2017 was constant in compar-

ison to the previous two years. Life insurance premiums accounted for 31 percent, medical for 29 percent, and motor for 23 percent of the premiums total, in unchanged ratios. These percentage shares of the three large business lines translate into written premium volumes of \$508.2 million in life, \$477.4 million in medical and \$379.6 million in motor insurance.

Insurance sector premiums

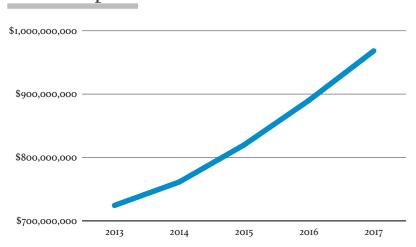

TC

The remaining 17 percent of the premiums cake were split between fire (7 percent), cargo (2 percent), civil liability (1 percent), engineering (1 percent), credit (0 percent), and other business (6 percent) when rounded to the nearest full percent figure. In this regard, the engineering and credit business reversed their relative positions in 2017 from the previous year, making credit the smallest contributor to sector premium totals with \$7.45 million and engineering the next smallest with \$8.31 million.

Benefits paid

Profitability of the sector rebounded in 2017, after having contracted by 16.6 percent from 2015 to 2016. While above \$153 million, as mentioned above, profits were still below the record profits of \$169.6 million achieved in 2015. Within the overall development of insurance sector profits in 2017, life business stood out with an upward leap of \$28.2 million, or more than 34 percent in year on year comparison.

This very strong increase – as a matter of fact, life insurance profits in 2017 were the strongest in the past four

years – allowed life insurance profits of \$110.5 million to account for over 72 percent of total sector profits. This positive performance was notably juxtaposed by negative profit performances in the medical business where profits contracted from \$21 million in 2016 to \$12.3 million in 2017, and in motor insurance, where the negative bottom line of -\$1 million in 2016 deteriorated further to almost -\$6.6 million.

Of the remaining business lines, cargo and credit insurance also saw negative profit developments while fire, civil liability and engineering saw improvements in their bottom lines. Profits for the "other business" contracted marginally, from \$17.64 million to \$17.17 million. It is prudent to note that the small volumes of premiums in the (by premiums volumes) minor insurance business lines often develop in ways that, when expressed in y-o-y percentages of growth or contraction and not seen in conjunction with the premiums developments in the line, give an exaggerated impression rather than a true indication of the line's sustainability and health.

For example, according to the annual report figures, the net income after tax in the engineering line in 2017 increased by 151.61 percent (from \$340,700 to \$854,200) but the underlying improvement in written premiums represented a much lower 11.0 percent increase; inversely, the widening of losses in the credit line from -\$242,900 in 2016 to -\$497,300 in 2017

amounted to -104.74 percent whereas the drop in written premiums at -6.62 percent, albeit the most severe in percentage terms across all business lines for 2017, was much more benign than the percentage change in net income of the line.

In this context, it appears more indicative of developments in the different insurance lines to examine what is shown by multiyear trends of profit developments from 2014 to 2017. In these four years, as the ACAL annual report figures reveal, overall profits for the sector showed a fair amount of volatility in the range of 213 to 256 billion Lebanese lira (\$141.4 million to \$169.5 million) paired with no clear direction of profit movements.

In life insurance business on the other hand, annual volatility of profits was also noticeable but less pronounced when compared to the sector total. By contrast to the life performance, the volatility in profits in the large medical and motor business line profits was significant and inconclusive in terms of the direction of profit evolutions. Fire insurance profits stood out in terms of low volatility and consistent upward direction over the four years shown in the ACAL report. Cargo business demonstrated limited volatility in context of an overall downward profits trend. Civil liability, other, engineering, and credit business line profits exhibited considerable volatility and inconclusive directions in context of their much narrower respective profit ranges.

On the capitalization of insurance companies, it is to be noted that shareholders' equity increased in 2017 and reached

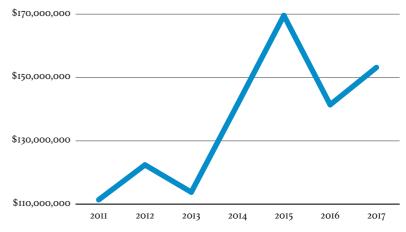

\$1.171 billion. This represents an annual increase of 7.5 percent in shareholders' equity. Paid-up capital also showed an increase and grew by 6.97 percent to \$427.4 million. Legal reserves of insurance companies reached \$78.7 million, with y-o-y increase of 4.34 percent, while general reserves grew 13.76 percent to \$180 million. Technical reserves of all insurance companies expanded by 3.47 percent to \$2.41 billion. In context of an overall lowering of debts by insurance companies,

the most notable contraction occurred in terms of bank debts which dropped by 60.6 percent to \$15.1 million.

Expenses of insurance companies incurred in connection with claims and benefits grew by 9.36 percent to \$1 billion. Paid benefits constituted \$968.2 million. Premiums that Lebanese insurance companies ceded locally and internationally to reinsurers in 2017 reached \$330.41 million, a 3.87 percent downward variation form 2016.

From 2014 to 2017, overall profits for the sector showed a fair amount of volatility

Insurance sector profits

Lebanon persisted to follow an economic trajectory of rising public debt and achieving not enough growth

Insurance results in context of Lebanon's national economic and political situation

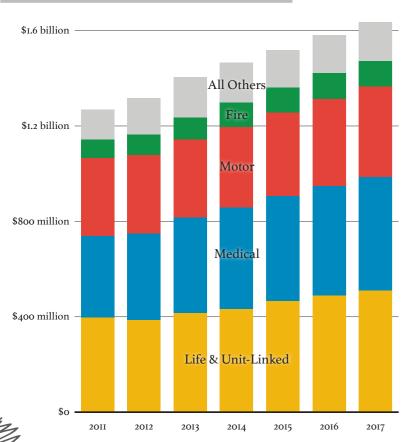

After several years of heavy exposure to regional turbulences brought on by the nearby conflicts in Syria and by the assault of Islamist militias on Syria and Iraq and exacerbation of the conflict's impact on Lebanon by unprecedented refugee inflows, 2017 was a year where these impacts showed some prospect of receding over coming years. Sentiment in the Lebanese economy in the first quarter of 2017 reflected this by being the most optimistic in several years, on account of hopes for regional, but also national political stabilization and development. The national hopes were nurtured throughout 2017 and well into 2018 by political prospects, such as the first national parliamentary elections after a long intermission in the democratic process and the adoption of state budgets for the Lebanese Republic after an even longer period of existing in a nominal fiscal vacuum.

A rise of optimistic notions in context of the young presidency of HE Michel Aoun – which commenced in October 2016 – and prospects for political progress and increasing stability of the Lebanese society did not mean, however, that the country could break out of the slow economic growth pattern of the previous multiyear period. This meant that also in 2017 and 2018, despite accomplishments in holding successful international conferences (most importantly the Paris CEDRE

conference in April 2018) and peaceful elections for the new Lebanese Parliament in May 2018, Lebanon persisted to follow an economic trajectory of rising public debt and achieving not enough growth.

In this economic and social context, Lebanon's insurance sector was not impermeable to the anemic growth of economic activity in the country's real economy sectors in 2017 and 2018. When compared with banking, insurance also in 2017/18 did not achieve desirable growth, although the sector proved to be less vulnerable than the economy's banking and monetary constituents to specific extraneous shocks, most prominently the confusion over a declaration of his resignation which Prime Minister Saad Hariri read out on television in the Kingdom of Saudi Arabia during a visit in ear-

ly November 2017. The prime minister's resignation was rescinded later in the same month, but the radical political uncertainty in Lebanon resurged on domestic terms with internal political disputes over formation of a new Council of Ministers, or government, which unpredictably persisted from each month to the next between the parliamentary elections in May 2018 to the end of the year, and beyond.

Margins and ratios in the insurance sector

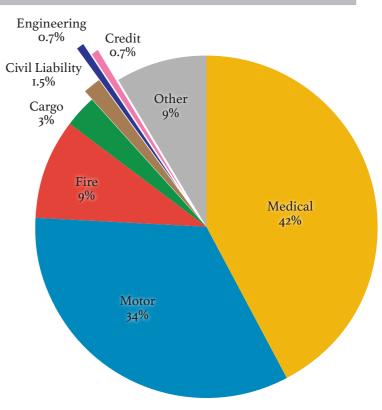

The net profit margin in the Lebanese insurance sector in 2017 was 9.37 percent, which represented an increase by 46 basis points from the sector's net profit margin of 8.91 per-

cent in 2016. However, as did the total annual profits for the insurance sector in 2017 could not match the record profit level of two years earlier, the margin remained below the level of II.I percent reported in 2015.

Net profit margins for the individual insurance business lines in 2017 were 22.02 percent for life, 12.45 percent for fire, 2.58 percent for medical, -1.74 percent for motor, and 14.02 percent for the miscellaneous lines not detailed here.

The combined ratio in the insurance sector in 2017 reached 95.71 percent for the total industry. Seen by business lines, the combined ratio in life insurance was 90.1 percent; medical, 98.9 percent; motor, 103.85 percent; cargo, 96.12 percent; civil liability, 81.82 percent; credit, 107.74 per-

Premium distribution excluding life

cent; engineering, 95.34 percent; and fire, 89.97 percent. The sector's financial income ratio improved from 8.62 percent in 2016 to 12.05 percent in 2017.
